Announcement Content	
Explanations	

As previously announced to the public in our company's material event disclosure dated June 30, 2026, our investment in an additional cold storage facility—featuring 6,840 m^2 of enclosed space at our production campus in the Dinar district of Afyonkarahisar—has been completed and is now operational. With the commissioning of this facility, our company's total cold storage capacity for fruit has increased from 2,000 tons to 15,000 tons, representing a 650% expansion in our storage capacity. This investment is expected to support our company's growth strategy within the fresh fruit market, while contributing to the preservation of product quality, the strengthening of supply chain management, and the enhancement of operational efficiency. Respectfully announced to the public. In the event of any discrepancy between the Turkish and English versions of this public disclosure, the Turkish version shall prevail.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
