Explanations	

Mavi has initiated the process to build its own solar power plant in line with its All Blue sustainability strategy and its goal of becoming a climate-positive company by 2050. Mavi, which currently purchases renewable energy, filed an application for a call letter with the Ministry of Environment, Urbanization and Climate Change within the framework of the "Regulation on Unlicensed Electricity Generation in the Electricity Market" to build a Solar Power Plant with an installed capacity of 8,308.30 MWp / 6,600 MWe in the Yenice district of the Sivrihisar county in the province of Eskişehir for the purpose of meeting the power requirements of the head office building and high street stores whose electricity meters are owned by the company, from sustainable sources. Once the call letter is approved and the connection agreement is signed, the project details will be disclosed to the public.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
