<b>Announcement Content</b>	
<b>Explanations</b>	

As previously disclosed to the public, we currently hold preliminary licenses for a total of 13 solar and wind power plants with storage, totaling 891.41 MW installed capacity, across 10 cities in Turkey. In this regard, we continue to work at full pace with an aim to complete all relevant processes and operations rapidly and move to licensing and investment phase.

Accordingly, Environmental Impact Assessment (EIA) process has been successfully completed for Mersin Wind Power plant with storage having 100.08 MWe installed capacity. Other remaining projects' EIA processes are ongoing as planned.

At Aksa Enerji, in line with our "Sustainable High Growth" strategy, we prioritize energy source diversification in our generation portfolio and continue to invest in renewable energy technologies to achieve our 2030 targets.

Further developments will be shared with the public on a timely manner.

Kind regards,

Note: In case of discrepancy between Turkish and English versions, Turkish version shall prevail.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
