Explanations	

As already announced in our Public Disclosure dated 10 November 2023, Aksa Energy signed an agreement with NEGU ("National Electric Grid of Uzbekistan"), which is affiliated with the Ministry of Energy of Uzbekistan, for the installation and operation of a natural gas combined cycle power plant with an installed capacity of 430 MW in Tallimarjon city of Uzbekistan.

The construction of the plant began in January 2024, and the initial units have been commissioned and started commercial operation. It is planned that the remaining units of the plant will be commissioned as simple cycle within this year, and power plant will continue commercial production as a combined cycle facility with a total capacity of 430 MW starting in January 2025.

The natural gas needed for electricity production at the plant will be provided by the Government of Uzbekistan, and the electricity sales price has been determined within the framework of a 25-year USD-based guaranteed capacity payment.

Kind regards,

Note: In case of discrepancy between Turkish and English versions, Turkish version shall prevail.
