Announcement Content	
Explanations	

Our company continues its work to realize renewable energy investments abroad.

Within the scope of project development activities carried out abroad; three separate contracts were signed with a project development company located in Romania to develop a solar power plant project with a total capacity of 350 MW, to obtain technical connection approval - ATR/building permit/connection agreement, and an important step was taken in terms of energy investments.

Our work to establish a new company (subsidiary) is ongoing in order to coordinate our renewable energy investments abroad and to realize investment strategies.

Developments regarding the subject will be announced to the public.

Best regards,

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
