Explanations	

In line with our company's decision to contribute to clean energy production and reduce carbon emissions, the ongoing permit processes for the planned 12,901.98 kWp capacity Ground-Mounted Solar Power Plant (GES) in Harran District, Şanlıurfa Province, were addressed in an update provided by the General Directorate of EIA, Permits, and Inspections of the Ministry of Environment, Urbanization, and Climate Change as of April 9, 2025. It was stated that the Revised Final EIA Report has been approved.

Once the project is completed as planned, an investment in a solar power plant of sufficient size to meet 100% of the electricity consumption resulting from our operations will have been realized.
