Share Purchase Agreement for the Acquisition of Sampo-Rosenlew Oy Shares

In line with its innovative, professional, and strategic vision, Tera Group has previously communicated its intention to expand into technology, industrial, and energy sectors to support its growth objectives and establish a strong presence in the strategic industries of the future.

Pursuant to these objectives, on September 29, 2025 (today), Tera Yatırım Teknoloji Holding A.Ş. signed a share purchase agreement with Mahindra & Mahindra Limited, one of the world's largest tractor manufacturers, to acquire 100% of the shares of Finland-based agricultural and forestry machinery manufacturer **Sampo-Rosenlew Oy**.

Through this acquisition, Tera Group aims to combine its technological vision with its financial expertise and extend its impact into the agricultural sector, paving the way for next-generation, robotic and/or AI-supported precision farming solutions.

With a distinguished heritage dating back to 1853, Sampo-Rosenlew Oy is recognized as one of the leading global agricultural machinery manufacturers and also holds a significant position in forestry machinery and harvesting equipment, as well as transportation vehicles.

The existing facilities in Pori, Finland, will serve as a central hub for research, development, and production activities, ensuring the continuity of the company's culture of innovation in agricultural machinery.

Tera Group intends not only to preserve Sampo-Rosenlew's engineering legacy but also to unlock new growth opportunities. Leveraging its strong financial position, the Group plans to expand Sampo's product portfolio and significantly enhance its global competitiveness through next-generation, unmanned, advanced, AI-driven solutions, aiming to become one of the world's leading players in technological agriculture.

In addition to consolidating Sampo's traditional presence in European markets, Tera Group sees substantial growth potential in Türkiye, neighbouring regions, the Turkic Republics, the Middle East, and Africa. The Group plans to replicate successful business models, such as those already implemented in Algeria, across these high-potential markets.

This acquisition represents the convergence of industrial expertise with financial and technological capabilities, aiming to create long-term value for employees, customers, and all stakeholders, while shaping the future of sustainable agricultural and forestry solutions. Furthermore, this strategic step marks a critical milestone in Tera Group's international growth journey and constitutes a key element of its vision to position Türkiye as a rising power within the global industrial ecosystem. TERA Group is proud to share this disclosure regarding a major international investment that integrates the synergies of agriculture and technology with all its stakeholders.

The transfer of shares is expected to be completed in the near term, and updates on the process will be communicated to the public.

Respectfully submitted for the information of the general public and investors.

About Sampo-Rosenlew Oy

Founded in 1853, Sampo-Rosenlew Oy specializes in the production of high-quality combine harvesters and forestry machinery, employing approximately 200 professionals in Pori, Finland.
