Explanations	

Turkcell and its subsidiaries ("Turkcell Group") have entered into a strategic partnership with Google and its subsidiaries ("Google Cloud"), a joint effort to deliver Google Cloud services to customers across industries, with a focus on organizations doing business and to accelerate cloud adoption in Türkiye. As part of this partnership, Turkcell will collaborate with Google Cloud to deliver the infrastructure required for a planned new Google Cloud region in Türkiye - estimated to become operational during the 2028 - 2029 timeframe - which will expand Turkcell's data center portfolio. The new region will consist of three or more zones.

As a trusted Google Cloud partner, Turkcell will build on its strong role as a leading provider of cloud infrastructure and services, and will also act as a reseller of Google Cloud services in the market. This will deepen support for organizations of all sizes and industries across Türkiye to accelerate their transition to the cloud and fully leverage its benefits. The new cloud region will provide local infrastructure in Türkiye, giving customers greater control over their data location and helping them address local data residency needs.

The new cloud region aims to strengthen Türkiye's digital ecosystem by providing high-performance, low-latency Google Cloud services. It will unlock advanced capabilities across data analytics, application modernization, cybersecurity, and digital business solutions-empowering organizations across industries to innovate, scale, and operate more efficiently. This will include access to cutting-edge technologies and is designed to meet increasing demand for cloud and artificial intelligence (AI) services.

This milestone underscores Turkcell's commitment to accelerating Türkiye's digital transformation, while strengthening its role in establishing the country as a regional hub for digital and AI innovation. As part of Turkcell's strategic growth projections, Turkcell expects its data center capacity to increase by more than double by the end of 2032 and Turkcell targets a sixfold increase in its data center and cloud revenues in USD terms over the same period.

Turkcell projects that its investment in connection with this partnership will be 1 billion USD by the end of 2032.
