Explanations	

Our Company's investment in the Low-Melt Polyester Staple Fiber Production Facility, with an annual capacity of 52,500 tons, has been completed. The facility has been commissioned at full capacity as of today, and has commenced commercial production.

Our facility will be the first in Europe and the Middle East to produce virgin Low-Melt Polyester. With the distinction of being the largest single-line Low-Melt Polyester Staple Fiber facility in the region, the plant will offer superior quality and cost advantages. The facility is expected to contribute approximately USD 75 million annually to the Company's revenue.

With the completion of the Low-Melt Polyester Staple Fiber investment, all planned investments at our Adana-Seyhan premises have been fully implemented and commissioned.

In the event of any discrepancy between the Turkish and English versions of this disclosure statement, the original Turkish version shall prevail. SASA disclaims all warranties and makes no representations about the accuracy or completeness of the English translation and assumes no liability for any errors, omissions or inaccuracies that may arise from use of this translation.

We proclaim that our above disclosure is in conformity with the principles set down in "Material Events Communiqué" of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we're personally liable for the disclosures.
