Explanations	

On May 25, 2026, the following statement was issued to ensure the public is accurately informed regarding news reports about our Karsan Autonomous e-ATAK vehicle, which is in service in Gothenburg, Sweden:

During its operation in Gothenburg, our e-ATAK autonomous vehicle was struck by a tram approaching from behind, as the tram was unable to maintain a safe following distance.

No injuries were reported in the incident.

Based on initial findings, the incident appears to be a traffic-related event occurring within the flow of urban traffic, rather than an issue related to the autonomous driving system.

The full details of the incident are currently being evaluated in collaboration with relevant local authorities and transportation stakeholders.

We hereby bring this to the public's attention.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
