Explanations	

Pursuant to our public disclosure dated March 1, 2024, our new coated glass line investment, with a gross capacity of 7 million sqm/year in Tarsus, Mersin, under the Controlled Investment Management principle of the Şişecam Efficiency Management Program and categorized as a priority investment, was completed and commissioned on June 17, 2026.

This investment, which increases the number of coated glass lines in Turkey to three and Turkey-based installed coated glass production capacity to 21 million sqm/year, aims to meet the rising demand for coated glass in the flat glass industry, maintain a competitive position through enhanced operational efficiency and an expanded product range, and create higher value for end-users by increasing the production volume of value-added products.

As a result of this investment, Sisecam's coated glass production capacity has increased by 17%, reaching 48.1 million sqm/year, with a total investment cost of 25 million euros.

The relevant press release can be found attached.

In case of a discrepancy between the Turkish and the English versions of this disclosure statement, the Turkish version shall prevail.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
