Explanations	

ASELSAN continues to make strategic investments to meet growing demand and further enhance its manufacturing capabilities.

As part of this commitment, ASELSAN has commissioned its "Smart Munitions and Underwater Systems Additional Production and Test Centers", representing a total investment of USD 40 million and encompassing 17,360 square meters of indoor space.

The new facilities significantly strengthen the Company's robotics and automation infrastructure for the production of Air and Naval Defense Systems, enhancing manufacturing capacity, accelerating delivery performance, and further improving quality standards.

ASELSAN respectfully announces this development to the public.

We proclaim that our above disclosure is in conformity with the principles set down in "Material Events Communiqué" of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we're personally liable for the disclosures.
