Announcement Content	
Explanations	

As disclosed in our Company's material event disclosures dated November 12, 2024 and April 28, 2025, in line with our Company's strategy to grow in the sustainable building materials sector and expand the capacity of value-added products, the new production facility investment made at our Mersin Plant in addition to the existing CAC (Calcium Aluminate Cement) production capacity has been commissioned following the completion of trial production and testing processes.

Following the commissioning of the new CAC production facility, our Company's annual CAC clinker production capacity has increased from 131 thousand tons to 197 thousand tons. Accordingly, our Company's position as the third largest producer in the global CAC market has been further strengthened.

In case of a discrepancy between the Turkish and English versions of this public disclosure statement, Turkish version shall prevail.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
