Explanations	

As a continuation of the Material Event Disclosure made by our Company on November 4, 2025 regarding the cells manufactured on the serial production line whose 25.03% cell efficiency was verified by Fraunhofer ISE, a further verification has been carried out.

Within the scope of the high-efficiency solar cell development activities conducted by our Company's R&D Center, sample G12R-size cells (182.3 × 210 mm) taken from the serial production line of our subsidiary, CW Solar Cell Enerji A.Ş., were submitted to the Fraunhofer ISE testing center. As a result of the measurements performed, a 25.11% cell efficiency was confirmed by a calibration certificate.

Following this verification, the calibration of the testing equipment used on the serial production line has been updated, and it has been confirmed that the efficiency values and distribution of the cells manufactured in serial production are 25.1% or higher.

Our Company continues its R&D activities aimed at further improving cell efficiency, and any significant developments achieved in this regard will continue to be shared with our investors.

Respectfully announced to the public.

This statement has been translated into English for informational purposes and disclosed simultaneously. In the event of any discrepancy between the Turkish and English versions of this disclosure, the Turkish version shall prevail.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
