Explanations	

As is known, our Company's sales and marketing activities in the wind energy industry and other fields of operation are carried out without interruption.

Within the scope of our international sales and marketing activities, a new region has been added to our sales territories in order to increase our export potential and strengthen our effectiveness in the global market. In this context, it is aimed to mitigate the risks arising from customs tariffs that have recently begun to emerge between countries.

In this framework, the offers submitted by our Company to our customer, PT. Kenertec Power System, have been approved. The related products will be shipped to our customer's production facilities located in Indonesia. The total amount of the offers is EUR 1.327.412 and deliveries are expected to be completed in the fourth quarter of 2026.

The disclosure of the inside information regarding the offer submission process was postponed by the resolution of our Board of Directors dated 22/06/2026 and numbered 2026/20.

We respectfully announce this to the public and our investors.
