Explanations	

Due to investor inquiries and comments received on social media regarding the disruption in commercial vessel traffic transporting grain in the Black Sea due to war conditions, the Company has deemed it appropriate to make this disclosure on the Public Disclosure Platform (KAP).

Our Company is not dependent on a single country or region for the supply of wheat traded as a commodity. As we have the capability to source products from different countries and regions, we are not experiencing any issues with product supply.

Furthermore, no supply issues are being experienced in the procurement of wheat, which is the raw material required for flour production, also due to the high levels of domestic production achieved this year.

Respectfully announced to the public.

The English translation of this disclosure is attached hereto, and in the event of any discrepancy between the disclosure texts, the Turkish version shall prevail.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
