Explanations	

The property deed documentation for the Company's Solar Power Plant (SPP) project, which was previously disclosed to be established in Silvan district in Diyarbakır province, with an annual capacity to generate 22,000 MWh of clean electricity on the average, were officially registered under the Company's designation on October 5, 2026, whereupon the necessary construction permit was subsequently obtained. Given that the administrative and legal procedures pertaining to the project remain incomplete beyond the originally anticipated timeline, a revision of the operational commencement schedule for our SPP investment has become imperative. Upon the successful completion of the aforementioned procedures, our Company intends to conclude and commission the SPP project in the final quarter of 2026, in accordance with existing projections.

Further developments regarding our SPP investments will continue to be announced via the Public Disclosure Platform.
