Explanations	

The Environmental Impact Assessment (EIA) process for the "Cement Production Facility Modernization, Energy Efficiency and Capacity Increase" project planned to be carried out at our Company's Ladik Plant in Samsun was initiated.
Within the scope of the project, through modernization and technological improvements at the Ladik Plant, the annual clinker production capacity is targeted to increase by 69% to a total of approximately 1.1 million tons.
In addition to increasing production capacity, the project aims to improve energy efficiency.

In case of a discrepancy between the Turkish and English versions of this public disclosure statement, the Turkish version shall prevail.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
