Announcement Content	
Explanations	

In our Company's material event disclosure dated September 8, 2026, it was announced to the public that investment activities had been initiated for the establishment of a solar panel manufacturing facility with an annual production capacity of 1 GW under CW Energy USA Inc., our wholly-owned subsidiary based in the United States of America (USA).

In this context, a lease agreement has been signed as of the date of this disclosure for the property consisting of land and a building where the planned solar panel manufacturing facility in the USA is intended to be established.

In line with the annual production capacity target of 1 GW, efforts to procure the machinery and equipment to be used at the manufacturing facility, as well as feasibility studies and production preparation activities carried out under the previously disclosed consultancy agreement, are ongoing.

The public will be informed, in accordance with the relevant capital markets legislation, should any developments requiring public disclosure arise in the subsequent stages of this investment, which aims to expand our Company's international manufacturing operations.

The English translation of this disclosure has been simultaneously disclosed to the public, and in the event of any discrepancy between the disclosure texts, the Turkish disclosure shall prevail.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
