Explanations	

In our material event disclosure dated 3 August 2026, we announced that work was ongoing on the Çelemli Factory Raw Material Preparation (Crushing and Screening) Plant, one of the investments included in the planned use of our IPO proceeds. As part of the investment undertaken at our Gündoğan Branch in the Ceyhan district of Adana province to strengthen the raw material supply infrastructure of our Çelemli Factory, the crushers, screens, conveyor belt systems and filtration systems have been commissioned. The investment is largely complete, and production at the plant commenced on 17 November 2026.

The plant, which covers a total area of 6,200 m^2, houses a limestone crushing and screening line. It has a limestone processing capacity of 625 tonnes per hour and 1,500,000 tonnes per year, based on 300 operating days.

Limestone extracted from our Company's site covered by mining licence no. 200704213 will be processed at the plant to the sizes required for lime production and transported to our Çelemli Factory. Located approximately 8 kilometres from the factory, the plant is expected to meet approximately 100% of the factory's annual limestone requirements.

As noted in our material event disclosure dated 19 October 2026, the machinery and equipment used at our Çukurova Branch that were excluded from the sale were transferred to our Gündoğan Branch. The transfer and installation were completed by 2 November 2026. The plant employs a total of 40 people, including employees transferred from our Çukurova Branch.

By commissioning the plant, we aim to meet the raw material needs of our Çelemli Factory from our own nearby licensed site, support continuity of supply and improve efficiency in raw material preparation and transportation.

Work on the remaining portion of the investment is ongoing. We will provide a further update to our investors upon completion of this work.

We respectfully announce this to the public.

The English translation of this disclosure has been prepared simultaneously. In the event of any discrepancy between the two versions, the Turkish version shall prevail.

We proclaim that our above disclosure is in conformity with the principles set down in “Material Events Communiqué” of Capital Markets Board, and it fully reflects all information coming to our knowledge on the subject matter thereof, and it is in conformity with our books, records and documents, and all reasonable efforts have been shown by our Company in order to obtain all information fully and accurately about the subject matter thereof, and we’re personally liable for the disclosures.
