**CONVENIENCE TRANSLATION INTO ENGLISH OF
INDEPENDENT AUDITOR'S REVIEW REPORT ON SEMI-ANNUAL REPORT
ORIGINALLY ISSUED IN TURKISH**

To the General Assembly of Aygaz Anonim Şirketi

We have been assigned to the review whether the financial information in the review report of Aygaz Anonim Şirketi (the "Company") and its subsidiaries (collectively referred as the "Group") prepared as at 30 June 2021 is consistent with the reviewed interim condensed consolidated financial information. Management is responsible for the preparation of the semi-annual report. Our responsibility is to express a conclusion on whether the financial information provided in the semi-annual report is consistent with the reviewed interim condensed consolidated financial information on which we have expressed our conclusion dated 11 August 2021.

We conducted our review in accordance with the Standard on Review Engagements ("SRE") 2410 "Review on Interim Financial Information Performed by the Independent Auditor of the Entity". Our review includes the assessment as to whether the financial information included in the semi-annual report is consistent with the reviewed interim condensed consolidated financial statements and other explanatory notes. A review is substantially less in scope than an audit conducted in accordance with Independent Auditing Standards, the objective of which is to express an opinion on the financial statements. Consequently, a review on the semi-annual financial information does not provide assurance that the audit firm will be aware of all significant matters which would have been identified in an audit. Accordingly, we do not express an audit opinion.

Based on our review, nothing has come to our attention that causes us to conclude that the accompanying financial information included in the review report is not consistent, in all material respects, with the interim financial information and the information presented in the explanatory notes to interim condensed consolidated financial statements.

RISK MANAGEMENT

Risk management is applied in accordance with international standards and practices as well as policies approved and strategic targets set by the Board of Directors, taking into

consideration feedback from departments and Executive Committee in particular. Given the financial, operational and legal risks encountered due to the nature of the industry, risks are managed -within the framework of corporate risk management- with an integrated, holistic, systematic and proactive approach along with risk assessments spread across the company and updated with the processes. To maintain and increase market value, the company aims to identify and manage risks, and to take advantage of opportunities at the same time. With effective corporate risk management in place, developing shared perspectives and strategies across the company remains the focus point.

Financial risks arising from uncertainties and fluctuations in foreign exchange, interest rates, liquidity and commodity prices are identified and evaluated and when necessary, relevant instruments are used to mitigate risks. Foreign exchange risks originate from purchases in foreign currencies regarding business activities or loans utilized in foreign currency for liquidity purposes. This risk is mitigated by the "natural hedge" that is created by reflecting exchange rate fluctuations on product sales prices and the foreign exchange position exposed to currency risk after the inventory within the said natural hedge is closely monitored and effectively managed. The risks are restricted and kept within targeted limits by forward or derivative transaction agreements when necessary. The interest rate risk shows its effects on rate- sensitive assets and liabilities. The negative effects of interest rate risk are eliminated balancing financial debts in terms of fixed/variable interest rates and short term/long term maturities.

Liquidity risk is managed by closely monitoring current and projected cash flows and ensuring maturity match between assets and liabilities. Net working capital is closely monitored to preserve short-term liquidity, and sufficient level of cash and cashlike assets are maintained against potential capital market fluctuations. Consequently, working capital needs and liquidity risks are minimized. The company's policy is to manage longterm liabilities with fixed-interest rates with flexible structures and to hedge the potential interest rate risks through derivative instruments. Available cash and non-cash credit lines are determined with the banks. In terms of commodity risks, derivative transactions are performed on inventory retained for natural hedge in order to limit the impact of price fluctuations in international markets.

Given its broad range of activities, Aygaz's receivables are spread across different industries and geographical regions through numerous dealers and customers. Concentrating on a specific field or a customer is avoided. Commercial receivables are monitored closely with regular reporting and assessments, taking care to keep customer credit risk exposure arising from commercial receivables within approved limits. The company acts diligently to conduct business with counterparties with high credibility and to mitigate the existing risks with collaterals.

Collaterals (letters of credit and guarantee performance bonds, pledges, etc.) are held to mitigate collection risks and risks are checked on transaction basis and the said collaterals are followed systemically. Payments are received via banking systems. The use of various payment systems also helps facilitating the collections and reducing the risks.

In terms of capital risk, the company's objective is to carry out business with the most efficient capital structure that minimizes the cost of capital while creating value for its shareholders. The most significant indicators considered for this purpose are the ratios of Net Financial Debt/EBITDA, Total Financial Debts/ Equity, Current Ratio and Liquidity Ratio, as well as maturity structure of Financial Debt and Net Working Capital. With all these indicators within the required limits, Aygaz A.Ş. has the capital structure and debt capacity to conduct its business in a healthy manner. The Board of Directors is informed through the reports prepared by the management and presented to the Risk Management Committee periodically.

OTHER ISSUES

Necessary actions were undertaken by the management to minimize possible effects of Covid-19 on Aygaz's operations and financial status. Despite the developments and slowdown in LPG sector and general economic activity due to Covid-19 pandemic, there were no disruption in LPG supply processes but there were some periodical fluctuations in the sales activities due to contracting demand.

Especially during the lockdown periods, autogas market contracted while cylinder gas market showed a partial growth due to increasing domestic demand. In the meantime, actions were undertaken by Company to minimize the investment expenditures, operational costs and the increase in the inventory. Cash management strategy was reviewed to strengthen the liquidity position. As the measures taken to prevent the spread of the pandemic are reduced, production and sales operations are continuing without any interruption while the recovery in demand is affecting Company's operations positively.

No estimates can be made regarding the duration of the Covid-19 neither globally nor for Turkey. However, Aygaz evaluated the possible effects of Covid-19 pandemic on its financial tables and assessed the estimates and assumptions used during the preparation of consolidated financial tables.
