3.2 Financial Analysis

Doğan Holding's Net Asset Value came in at 3.2 billion USD as of 3Q26 (13% ytd), and the Group recorded 30.0 billion TL in revenues, 6.0 billion TL in EBITDA, and 2.0 billion TL in net profit in the third quarter of 2026. During the quarter, EBITDA margin increased by 7pp y/y and reached 20%.

4. OPERATIONAL HIGHLIGHTS FOR THE PERIOD

- Doğan Holding's total revenues came in at 30.0 billion TL in 3Q26 (+6% y/y). Strong growth at Hepiyi, Gümüştaş and D Investment Bank more than offset the softer performance in the energy and automotive segments. Excluding the automotive segment, revenue growth was 11% y/y in 3Q26.

- Meanwhile, EBITDA came in at 6.0 billion TL in 3Q26, +64% y/y in real terms. Lower labour costs at Karel following its operational turnaround, stronger output at Gümüştaş and tight cost control at Galata Wind supported profitability, bringing the consolidated EBITDA margin to 20% (3Q25: 13%).

- Net Asset Value (NAV) came in at 3,194 million USD as of end-September 2026 (13% ytd). The change was primarily driven by the finance segment (+241 million USD) and Gümüştaş Mining (+194 million USD). The share of Strategic Focus Areas within NAV stood at 57% (3Q25: 48%).

- The Holding's standalone net cash position came in at 645 million USD (+5% y/y; 9M25: 617 million USD). No capital injections were required for any subsidiary during the third quarter. Compared to previous year, the share of TL-denominated assets within our standalone net cash changed from 14% to 18%.

- Our strategic focus areas continue to deliver strong results in 2026:
  - **Mining:** Gümüştaş recorded 63% revenue growth y/y and a 54% EBITDA margin in 9M26, compared with its FY26 guidance of at least 40% revenue growth and a 40–50% EBITDA

margin. The company achieved a 46% y/y increase in ore production in 9M26 and completed the capacity expansion at its processing facility, which has been operating at target capacity since October.

- **Financial services:** Hepiyi Sigorta's Assets Under Management (AUM) increased by 41% y/y to 985 million USD. Supported by its disciplined and profitable growth strategy, the company continued to gain market share in written premiums, with its share rising by 109 bps y/y to 7.1% in MTPL insurance and by 45 bps y/y to 4.6% in the MOD segment. Leveraging Artificial Intelligence in its claims payment operations, the company has become the fastest claims-paying insurer in MOD segment as per June industry data. In 3Q26, gross written premiums grew by 45% y/y to 10.4 billion TL, while net profit more than doubled (+113% y/y) to 2.6 billion TL (excluding TAS 29).

- **Renewable energy:** Galata Wind maintained its installed capacity at 354 MW during 3Q26. Galata Wind's electricity generation declined by 5% y/y in 3Q26, while Türkiye's total generation rose by 0.4% y/y on the back of a 96% increase in hydroelectric output. The USD-based Market Clearing Price (MCP) declined by 18% y/y to 58 USD, recovering from 20 USD in 2Q26. Revenue declined by 29% y/y in real terms; however, the EBITDA margin recovered to 62% (2Q26: 33%) on the back of controlled operating expenses and recovering MCP. Net profit came in at 313 million TL in 3Q26.

- Doğan Holding outperformed the Holding Index in 9M26, delivering a total return of 8.4% year-to-date versus -17.2% for the index, implying a 26 pp outperformance. The share of foreign investors in the free float also increased by 8.8 pp y/y, from 18.5% to 27.3% as of end-September 2026, while the share of institutional investors reached 57.4%.

4.1 Management Assessment

Our strategic focus areas once again set the performance for the Group in the third quarter. Gümüştaş Mining increased its ore production by 46% y/y in 9M26 and completed the capacity expansion at its processing facility, which has been operating at the target capacity since October. Hepiyi Sigorta grew its assets under management to 985 million USD and more than doubled its net profit y/y.

Our Net Asset Value stood at 3.2 billion USD (13% YTD) and our consolidated EBITDA came in at 14.4 billion TL in 9M26, with an EBITDA margin of 17.0% with a balanced contribution from all verticals. This success is the result of our holding portfolio reshaping. Looking at our acquisitions and exits over the past five years, we see that we have exited investments generating low single-digit IRRs, while companies delivering double-digit IRRs and creating strategic value to our country have been added to the holding portfolio. In other words, we have been selectively reallocating our portfolio toward businesses with higher return potential, at the same time, by streamlining our portfolio, we are able to focus more on our existing businesses and drive performance improvements. In line with this strategic direction, we have signed an agreement for the sale of Kanal D Romania in late October, at an enterprise value of 109 million EUR, as part of our ongoing efforts to streamline our portfolio. In addition, we restructured Dogan Trend's motorcycle operations in October to focus our financial and organizational resources on our core automotive brands, Suzuki, MG and Maxus.

The rest of the portfolio further reinforced this picture. Increased ore production and processing coupled with high-quality pyrite concentrate at Gümüştaş drove further EBITDA growth; Galata Wind kept its EBITDA margin above 60% despite y/y lower electricity prices, thanks to tight cost control, while Karel continued to reflect the impact of its ongoing operational transformation and hence delivered 20% EBITDA margin in 3Q26 vs 10% a year ago. Investments continued alongside ongoing EBITDA margin improvements across the portfolio. During the period, Galata Wind pressed ahead with

its power generation and energy storage investments in Türkiye and abroad, while Karel strengthened its leading position in communication technologies and, as part of its operational transformation, continued to make strides in its higher-margin manufacturing and automotive business lines.

Above all, this quarter confirms that our portfolio is evolving exactly as we intended. With the share of our strategic focus companies in total Net Asset Value at 57% (48% a year ago), our revenue and EBITDA composition has become healthier, more balanced and more resilient to cyclical shifts. We are delivering growth exactly where we want it, reinforcing our confidence in achieving our USD 4.5 billion Net Asset Value target by 2030.

5. RISKS AND CONTROL MECHANISMS

Our company manages the risks it may encounter while conducting its activities in line with the principles of sustainability and efficiency through a proactive approach. In this context, we address our risk management processes under four main categories: financial, operational, compliance, and strategic risks.

5.1 Strategic Risks

Strategic risks encompass structural risks that could hinder our company's achievement of its long-term objectives. Changes in market conditions, competitive environment, technological developments, and economic factors are among these risks. The management of strategic risks is carried out in an integrated manner with our company's strategic planning processes and is reviewed regularly.

5.2 Financial Risks

Financial risks include factors that could affect our company's financial performance and liquidity. Exchange rate fluctuations, changes in interest rates, volatility in commodity prices, and counterparty risks are evaluated within this scope. These risks are monitored regularly and managed using appropriate financial instruments when necessary. Moreover, to ensure that financial risks remain within defined limits, monitoring and management activities are conducted both at the company level and on a consolidated basis through various financial indicators.

5.3 Operational Risks

Operational risks cover risks arising from internal processes, people, systems, or external events that the company may encounter during its daily operations. These risks include information technology risks, human resource management risks, and disruptions in processes. Standard approaches are implemented to identify, measure, and manage operational risks, and actual and potential loss data related to operational risks are collected.

5.4 Compliance Risks

Compliance risks involve the risks our company may face if it fails to comply with legal regulations and internal policies and procedures. The management of these risks is ensured through close monitoring of regulatory changes, the effectiveness of internal control systems, and regular audits. Effective

management of compliance risks is of great importance for protecting our company's reputation and fulfilling its legal obligations.

Our company continuously improves its risk management processes and ensures alignment with international standards. In doing so, the effective management of risks and the achievement of our company's sustainable growth objectives are secured.

5.5 Internal Control and Risk Management

During the first nine months of 2026, the Internal Audit department, operating under the Doğan Holding Vice Presidency of Internal Audit, Risk Management, and Compliance, continued to evaluate the effectiveness of the risk management, control, and governance processes of group companies. Audits were conducted within the scope of the annual audit plan approved by the Board of Directors. The Audit Committee delivered five reports during this period to oversee the effectiveness of the audit processes, while the Early Detection of Risk Committee delivered four reports during the same period.

6. CORPORATE GOVERNANCE AND RELATED PARTY TRANSACTIONS

6.1 Statement of Compliance with Corporate Governance Principles

The Corporate Governance Compliance Report for the 2025 fiscal year, prepared in accordance with the Capital Markets Board's Decision dated 10 January 2019 and numbered 2/49, and approved by the Board of Directors of Doğan Holding, was published on the Public Disclosure Platform (PDP) on 9 March 2026. In addition, developments regarding corporate governance practices during the period were disclosed to the public through updates to the relevant section of the Public Disclosure Platform (PDP). On 15 September 2026, the Company updated its compliance status with respect to Article 4.3.9 of the Corporate Governance Principles. Accordingly, the Company aims, taking into account the minimum 25% threshold recommended under the Corporate Governance Principles of the Capital Markets Board of Türkiye, to increase the proportion of women members on the Board of Directors to at least 30% and the proportion of women across management levels to at least 30% across the Doğan Group by the end of 2030.

6.2 Related Party Transactions

Transactions with related parties are disclosed in *Note 18 – Related Party Disclosures of the notes* to the consolidated financial statements for the interim accounting period between 01.01.2026 and 30.09.2026.

6.3 Summary of the Affiliation Report (If Applicable)

Not applicable.

6.4 Corporate Governance Activities During the Period

The Corporate Governance Committee held 7 meetings during the period within the scope of its duties and responsibilities, aiming to enhance compliance with corporate governance principles, improve management processes, and ensure the effective management of stakeholder relations. In addition, the Committee closely monitored processes related to shareholder relations, public disclosure activities, and the management of stakeholder expectations.

7. LEGAL MATTERS AND OTHER ISSUES

7.1 Legal Proceedings and Lawsuits

The provisions set aside for lawsuits filed against the Group and related compensations are disclosed in the notes to the consolidated financial statements for the interim period ended 30 September 2026, under *Note 11 – Provisions, Contingent Assets and Liabilities / (a) Provision for lawsuits and indemnity.*

NOTE 2 - BASIS OF PRESENTATION OF FINANCIAL STATEMENTS

2.1 Basis of Presentation

2.1.1 Preparation and Presentation of Financial Statements

Adopted Financial Reporting Standards

The accompanying interim consolidated financial statements have been prepared in accordance with the presentation principles set out in the Communiqué on Principles Regarding Financial Reporting in the Capital Markets (II-14.1) of the Capital Markets Board ("CMB"), and in compliance with the Turkish Financial Reporting Standards ("TFRS") issued by the Public Oversight, Accounting and Auditing Standards Authority ("POA"), pursuant to subparagraph (b) of Article 9 of the Decree Law No. 660. These financial statements have been prepared in accordance with the 2024 TFRS Taxonomy developed by the POA and announced to the public through the POA's decision dated 4 July 2024.

In accordance with Turkish Accounting Standard No. 34 'Interim Financial Reporting,' entities are allowed to prepare either a full set or a condensed set of interim financial statements. In this context, the Group has elected to prepare condensed consolidated financial statements for interim periods. Therefore, these interim condensed consolidated financial statements should be read in conjunction with the Group's consolidated financial statements as of 31 December 2025.

The Group maintains its statutory accounting records in accordance with the Tax Legislation and the Uniform Chart of Accounts issued by the Ministry of Finance of the Republic of Turkey (General Communiqué on Accounting System Implementation) and prepares its statutory financial statements in Turkish Lira.

The condensed consolidated financial statements have been prepared on the historical cost basis, except for financial instruments and investment properties which are measured at fair value.

Adjustment to the financial statements in hyperinflationary periods

The Group has prepared its financial statements for the year ended and as of 30 September 2026, in accordance with TAS 29 "Financial Reporting in Hyperinflationary Economies," based on the announcement made by the Public Oversight Accounting and Auditing Standards Authority (POA) on 17 April 2024, and the published "Implementation Guide on Financial Reporting in Hyperinflationary Economies." In accordance with this standard, financial statements prepared in the currency of a hyperinflationary economy must be expressed in the purchasing power of that currency as of the balance sheet date, and prior period financial statements must also be restated in terms of the current measuring unit at the reporting date for comparative purposes. Accordingly, the Group has also restated its financial statements as of 31 December 2025 and 30 September 2025, in terms of purchasing power as of 30 September 2026.

Pursuant to the Capital Markets Board (CMB) decision dated 28 December 2023, and numbered 81/1820, issuers and capital market institutions subject to financial reporting regulations applying Turkish Accounting/Financial Reporting Standards are required to apply inflation accounting under TAS 29 starting from their annual financial reports for the accounting period ending 31 December 2021.

The restatements made under TAS 29 were carried out using the adjustment coefficient derived from the Consumer Price Index ("CPI") published by the Turkish Statistical Institute ("TÜİK").

NOTE 2 - BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Continued)

2.1 Basis of Presentation (Continued)

2.1.1 Preparation and Presentation of Financial Statements (Continued)

Adjustment to the financial statements in hyperinflationary periods (Continued)

Financial reporting in hyperinflationary economies

The gain or loss in the net monetary position resulting from the restatement of non-monetary items is included in profit or loss and presented separately in the statement of profit or loss and other comprehensive income.

Restatement of the Profit or Loss Statement

All items in the statement of profit or loss are expressed in the unit of measurement in effect at the end of the reporting period. Therefore, all amounts are restated by applying changes in the monthly general price index.

The cost of inventory sold is adjusted using the restated inventory balance.

Depreciation and amortization expenses have been adjusted using the restated balances of mining assets, property, plant and equipment, intangible assets and right-of-use assets.

Restatement of the Cash Flow Statement

All items in the statement of cash flows are expressed in the measurement unit valid at the end of the reporting period.

As of 30 September 2026, the indices and conversion factor used in the correction of financial statements are as follows:

Year End	Index	Conversion Factor	Three Year Compound Inflation Rate
30 September 2026	4,368.35	1.00000	%158
31 December 2025	3,513.87	1.24317	%211
30 September 2025	3,367.22	1.29732	%222

The main elements of the Group's adjustment for financial reporting purposes in high-inflation economies are as follows:

- The current period consolidated financial statements prepared in TRY are expressed with the purchasing power at the balance sheet date, and the amounts from previous reporting periods are also expressed by adjusting according to the purchasing power at the end of the reporting period.

- Monetary assets and liabilities are not adjusted as they are currently expressed in current purchasing power at the balance sheet date. In cases where the inflation-adjusted values of non-monetary items exceed the recoverable amount or net realizable value, the provisions of TAS 36 and TAS 2 were applied, respectively

- Non-monetary assets and liabilities, as well as components of equity, that have not been expressed in terms of the current purchasing power at the reporting date have been restated using the relevant adjustment coefficients.

NOTE 2 - BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Continued)

2.1 Basis of Presentation (Continued)

2.1.1 Preparation and Presentation of Financial Statements (Continued)

Adjustment to the financial statements in hyperinflationary periods (Continued)

- All items in the statement of comprehensive income, except those that affect the statement of comprehensive income of non-monetary items in the balance sheet, are indexed with coefficients calculated over the periods when the income and expense accounts are first reflected in the financial statements.

- The effect of inflation on the Group's net monetary asset position in the current period is recorded in the net monetary position loss account in the income statement.

Functional and Presentation Currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The condensed consolidated financial statements are presented in Turkish Lira, which is the functional and presentation currency of Doğan Holding.

Restatement of the Financial Position Statement

Amounts in the statement of financial position that are not expressed in the measurement unit valid at the end of the reporting period are restated. Accordingly, monetary items are not restated because they are expressed in the currency valid at the end of the reporting period. Non-monetary items must be restated unless they are shown in their current amounts at the end of the reporting period.

2.1.2 Financial statements of subsidiaries and joint ventures operating in foreign countries

Financial statements of subsidiaries and joint ventures operating in foreign countries are prepared in accordance with the laws and regulations in force in the countries in which they are registered and required adjustments and reclassifications reflected for the purpose of fair presentation in accordance with the Group's accounting policies.

If the group entities' functional currency is different from the presentation currency; it is translated into the presentation currency as below:

- Assets and liabilities for each statement of financial position presented are translated at the exchange rate at the date of that statement of financial position.
- Income and expenses for each statement of profit or loss are translated at average exchange rates in the accounting period; and all resulting exchange differences are recognised as a separate component of equity and statements of other comprehensive income (currency translation differences).

When a foreign operation is partially disposed of or sold, exchange differences recorded in equity are recognised in the consolidated statement of profit or loss as part of the gain or loss on sale. Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

NOTE 2 - BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Continued)

2.1 Basis of Presentation (Continued)

2.1.3 Consolidation and equity method accounting principles

The condensed consolidated financial statements include the accounts of the parent company, Doğan Holding, its Subsidiaries and its Joint Ventures (collectively referred as the "Group") on the basis set out in sections (a) to (c) below. The financial statements of the companies included in the consolidation are based on historical cost of the statutory records and for the purpose of fair presentation in accordance with the accounting policies described in Note 2.1.1 and Note 2.1.2 and application of uniform accounting policies and presentations; adjustments and reclassifications. Financial statements of consolidated entities are restated in accordance with the TAS considering the accounting policies and presentation requirements applied by the Group.

2.1.4 Changes in the Group's Ownership Proportions in Subsidiaries

As at 30 September 2026, the voting rights and effective ownership interests of the Group's subsidiaries, joint ventures and associates have not changed from those reported as at 31 December 2025, except for the entities mentioned below.

Subsidiaries consist of entities that are directly or indirectly controlled by Doğan Holding.

Control is established when the Group meets the following conditions:
- Having power over the investee/entity,
- Being exposed to or having rights to variable returns from the investee/entity, and
- Having the ability to use its power to affect those returns.

If any event or circumstance arises that may result in a change in at least one of the criteria listed above, the Group reassesses whether it has control over its investment. The Group considers all relevant facts and circumstances, including the following elements, when assessing whether the majority of voting rights in a given investment is sufficient to confer control:

- Comparison of the voting rights held by the Group with those held by other shareholders,
- Potential voting rights held by the Group and other shareholders,
- Rights arising from contractual agreements, and
- Other facts and circumstances that may indicate the Group's ability to direct relevant activities in decision-making situations, including past voting patterns in general assembly meetings.

Subsidiaries are consolidated by the date the Group takes control and from the date the control is over, subsidiaries are excluded from the consolidation scope. Proportion of ownership interest represents the effective shareholding of the Group through the shares held by Doğan Holding and/or indirectly by its subsidiaries

The income and expenses of subsidiaries acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the acquisition date to the date of disposal.

(b) Non-Controlling Interests

Non-controlling interests of shareholders over the net assets and operational results of subsidiaries are classified as non-controlling interest and non-controlling profit/loss in the consolidated statement of financial position and consolidated statement of income.

(c) Joint Ventures

According to TFRS 11 Joint Agreements, investments under joint agreements are classified as joint activities or joint ventures. The classification is based on contractual rights and obligations of all investors, rather than the legal structure of the joint agreement. An investment is accounted for by equity method from the date at which invested company qualified as an associate or joint venture. In acquisition of the investment, all differences between the acquisition value of the investment and the company's share of the net fair value of identifiable net assets, liabilities and contingent liabilities of the affiliate or the joint venture, are included in the book value of affiliate investment. The portion of the amount that the company's share from the net fair value of the identifiable assets and liabilities of the affiliate or the joint venture, and that exceeds the acquisition value of the investment, is added to the income in determining the amount of the company's share from the profit or loss of the affiliate or joint venture in the period that the investment is obtained.

Interests in joint ventures are accounted for using the equity method, after initially being recognised at cost in the consolidated balance sheet.

NOTE 2 - BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Continued)

2.1 Basis of Presentation (Continued)

2.1.6 Offsetting

Financial assets and liabilities are offset and the net amount is reported when there is a legally enforceable right to set-off the recognised amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

2.1.7 Comparative information and restatement of prior period financial statements

The current period condensed consolidated financial statements of the Group include comparative financial information to enable the determination of the trends in financial position and performance. In order to ensure compliance with the presentation of the current period consolidated financial statements, comparative information is reclassified when necessary and significant differences are explained.

Under the agreements entered into with the minority shareholders of Hepiyi Sigorta, one of the Group's subsidiaries, both put and call options exist in respect of the minority interests. (Note 11)

As of 30 September 2026, the Group reassessed its accounting treatment of the aforementioned option arrangement and concluded that the related liability should have been recognized retrospectively from the date of its initial recognition. Accordingly, the relevant accounting treatment has been applied retrospectively, and the comparative financial statements have been restated in accordance with TAS 8, "Accounting Policies, Changes in Accounting Estimates and Errors".

As a result of this restatement, the "Other long-term provisions" line item in the consolidated statement of financial position as at 31 December 2025 increased by TL 3,785,523, while the "Put option valuation reserve relating to non-controlling interests" decreased by TL 2,630,689 as at 1 January 2025 and by TL 4,706,057 as at 31 December 2025. (Note 11)

2.1.8 Significant accounting policies and changes in accounting estimates and errors and restatement of prior period financial statements

In order to ensure compliance with the presentation of the current period consolidated financial statements, comparative information is reclassified when necessary and significant differences are explained.

Changes of accounting policies resulting from the first-time implementation of the TAS are implemented retrospectively or prospectively in accordance with the transition provisions. Major accounting mistakes detected are applied retrospectively and the financial statements of the previous period are revised. If the changes in accounting estimates only apply to one period, then they are applied in the current period when the change occurs; if the changes apply also to the future periods, they are applied in both the period of change and in the future period.

2.2 Summary of significant accounting policies

Condensed consolidated interim financial statements for the period ending on 30 September 2026 have been prepared in accordance with TAS 34 for the preparation of interim financial statements of TFRS. In addition, the interim condensed consolidated financial statements for the interim period ended 30 September 2026 have been prepared by applying the accounting policies consistent with the accounting policies applied during the preparation of the consolidated financial statements for the year ended 31 December 2025. Therefore, these interim condensed consolidated financial statements should be evaluated together with the consolidated financial statements for the year ended 31 December 2025.

NOTE 2 - BASIS OF PRESENTATION OF FINANCIAL STATEMENTS (Continued)

2.2 Summary of significant accounting policies (Continued)

Derivative Financial Instruments and Hedge Accounting

The Group uses derivative financial instruments to hedge against price risks arising from its sales of minerals in the ordinary course of its operations. Although the Group's functional currency is the Turkish Lira, the customer, sales volume and unit selling price relating to mineral sales are determined in US Dollars prior to the extraction of the minerals.
The Group enters these derivative transactions to manage the price risk arising from highly probable forecast mineral sales, and these transactions are not undertaken for speculative purposes. Accordingly, these transactions are designated as cash flow hedges.
When the qualifying criteria for hedge accounting are met, the effective portion of changes in the fair value of the hedging instrument relating to cash flow hedges is recognized in other comprehensive income and accumulated in the cash flow hedge reserve within equity. Amounts accumulated in equity are reclassified to profit or loss in the period or periods in which the hedged cash flows affect profit or loss, in the same period as the related financial statement item. Changes in fair value attributable to the ineffective portion of the hedging relationship are recognized directly in profit or loss.

Repurchased shares

Pursuant to the resolution of the Board of Directors of the Group dated 2 April 2025, within the framework of the Capital Markets Board's Principle Decision no. i-SPK.22.9 (dated 19 March 2025 and numbered 16/531), the "Share Buyback Programme", under which the maximum number of shares to be repurchased was determined as 50,000,000 shares and the maximum fund amount as TRY 1,000,000,000 (in nominal terms), with the aim of contributing to the formation of a healthy and stable price in the Company's share market, expired as of 10 April 2026. During the period in which the aforementioned "Share Buyback Programme" was in effect, 3,043,115 shares, representing 0.1163% of the Company's issued share capital, were repurchased. Together with the shares repurchased in prior periods, the total number of shares repurchased reached 44,322,953 (ratio to the Company's issued share capital: 1.6937%).

On the other hand, the (additional) "Share Buyback Programme", under which the maximum number of shares to be repurchased was determined as 100,000,000 shares and the maximum fund amount as TRY 1,500,000,000 (in nominal terms), was approved at the Ordinary General Assembly held on 11 April 2025 to be valid for a period of three (3) years and is currently in effect.

Derivative and Hedging Instruments

The Group enters hedging transactions to protect against potential fluctuations in the selling prices of minerals produced during its operations. Although the Group's functional currency is the Turkish Lira, the customer, sales volume and unit selling price relating to mineral sales are finalized in US Dollars prior to the extraction of the minerals.

NOTE 19 - INCOME TAXES

Turkish tax legislation does not allow the parent company to file tax returns based on the financial statements in which it consolidates its subsidiaries and joint ventures. For this reason, the tax provisions reflected in these consolidated financial statements have been calculated separately for all companies included in the scope of consolidation.

Corporate tax

As of 30 September 2026 and 31 December 2025, the period profit tax liability is as follows:

	30 September 2026	31 December 2025
Provision for current income tax	3.934.703	3.651.947
Less prepaid corporate taxes	(2.180.939)	(3.167.923)
Current income tax liability	**1.753.764**	**484.024**

The corporate tax rate is applied to the tax base found by adding expenses that are not deductible according to tax laws to the commercial income of the corporations, and deducting the exemptions (participation income exemptions) and discounts (such as R&D discounts) included in the tax laws. If the profit is not distributed, no other tax is paid.

Companies calculate a provisional tax of 25% on their quarterly financial profits and declare it by the 14th day of the second month following that period and pay it by the evening of the 17th day. The provisional tax paid during the year is for that year and is offset from the corporate tax to be calculated on the corporate tax return to be submitted the following year. If there is a remaining amount of provisional tax paid despite the offset, this amount can be refunded in cash or offset against any other financial debt to the state.

NOTE 19 - INCOME TAXES (Continued)

Corporate tax (Continued)

With the "Law on the Establishment of Additional Motor Vehicle Tax for Compensation of Economic Losses Caused by the Earthquakes Occurring on 6/2/2023 and Amendment of Certain Laws and Legislative Decree No. 375" published in the Official Gazette dated 15 July 2023 and numbered 32249, the provisional tax and corporate tax rate was increased to 25% (30% for Banks and Other Financial Institutions). It was decided that this rate would be applied to provisional and corporate tax declarations submitted after 1 October 2023 (2025: 25%). In the consolidated financial statements of the Group as of September 30, 2026, when calculating deferred tax assets and liabilities for its subsidiaries located in Turkey, the tax rate for the parts of the relevant temporary differences to be realized as of 2026 has been taken into account as 25%.

There is no practice of reaching an agreement with the tax authority regarding the taxes to be paid in Turkey. Corporate tax returns are submitted to the affiliated tax office by the evening of the 25th day of the fourth month following the month in which the accounting period is closed.

The authorities authorized to conduct tax audits may examine the accounting records within five years and if an erroneous transaction is detected, the amount of tax to be paid may change due to the tax assessment to be made.

Under the provisional article added to the Tax Procedure Law by Law No. 7571 published in the Official Gazette dated 24 December 2025, it has been stipulated that, even if the conditions are met, no inflation adjustment based on the Producer Price Index (PPI) shall be applied for the 2025, 2026 and 2027 accounting periods. Accordingly, inflation adjustments have not been applied in the statutory financial statements that form the basis for corporate tax returns for the mentioned periods.

Deferred taxes

The Group calculates deferred income tax assets and liabilities by taking into account the effects of temporary differences arising from different evaluations between the Turkish Financial Reporting Standards and tax financial statements of the financial position statement items. The temporary differences in question arise from the accounting of income and expenses in different reporting periods according to Turkish Financial Reporting Standards and tax laws and from the transferred financial loss.

The rates to be applied for deferred tax assets and liabilities calculated according to the liability method on long-term temporary differences that will occur in future periods are the tax rates valid on the dates of the financial position statement and these rates are included in the table and explanations above.

As of 2025, the inflation adjustment to be applied under the Tax Procedure Law has been postponed for the 2025, 2026 and 2027 accounting periods by Law No. 7571. In this context, the Group has revalued certain assets subject to depreciation in accordance with Repeated Article 298/Ç of the Tax Procedure Law for the relevant period; the increase in value has been recorded in the fund account in the legal records. This application is for tax purposes only and has no effect on the book values in the IFRS financial statements.

Pursuant to Law No. 7582 dated 4 June 2026, the corporate income tax rate applicable to profits earned by entities holding an industrial registry certificate and engaged in actual production activities effective from 1 January 2027 will be reduced from 25% to 12.5%. While this legal regulation does not affect the current period's tax liability, the deferred tax calculations included in the financial statements as of 30 September 2026 reflect the temporary difference based on the expected subsequent period tax rate.

NOTE 19 - INCOME TAXES (Continued)

Deferred taxes (Continued)

The breakdown of accumulated temporary differences, deferred tax assets and liabilities as at 30 September 2026 and 31 December 2025, prepared using the applicable tax rates, is as follows.:

Conclusions of netting has been reflected to consolidated statement of financial position of Doğan Holding and its subsidiaries which are separate taxpayer companies, have booked their deferred tax assets and liabilities by netting in their financial statements that were prepared in accordance with the TAS. Temporary differences and deferred tax assets and liabilities shown above have been prepared based on gross values.

The Group recognized deferred tax assets over TRY 1,045,608 of carry forward tax losses in the consolidated financial statements prepared in accordance with the TAS as of 30 September 2026 (31 December 2025: TRY 1,231,310). As of 30 September 2026 and 31 December 2025, the maturity analysis of carry forward tax losses is as follows:

NOTE 20 - FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

Financial Instruments and Financial Risk Management

The Group's activities expose it to a variety of financial risks; these risks are credit risk, market risk including the effects of changes in debt and equity market prices, foreign currency exchange rates, fair value interest rate risk and cash flow interest rate risk, and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the financial performance of the Group. The Group uses derivative financial instruments in a limited manner to hedge these exposures.

a) Market risk

a.1) Foreign currency risk

The Group is exposed to foreign exchange risk through the impact of rate changes on the translation of foreign currency liabilities to local currency. These risks are monitored and limited by analyzing foreign currency position. TRY equivalents of foreign currency denominated monetary assets and liabilities as of 30 September 2026 and 31 December 2025 before consolidation adjustments and reclassifications are as follows:

The Group is exposed to foreign exchange risk arising primarily from the USD and EUR, the other currencies have no material impact.

b) Credit risk

Credit risk involves the risk that counterparties may be unable to meet the terms of their agreements. These risks are monitored by credit ratings and by setting credit limits to individual counterparties. The credit risk is generally highly diversified due to the large number of entities comprising the customer bases and their dispersion across many different industries.

The table representing the Group's credit risk of financial instruments as of 30 September 2026 is as follows:

NOTE 20 - FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (Continued)

c) Fair value of financial instruments

Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation, and is best evidenced by a quoted market price, if one exists.

The estimated fair values of financial instruments are determined by the Group, using available market information and appropriate valuation methodologies for each segment of the Group. However, judgment is necessarily required to interpret market data to estimate the fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Group could realize in a current market exchange.

The following methods and assumptions are used in the estimation of the fair value of the financial instruments for which it is practicable to estimate fair value:

Monetary assets

The fair values of balances denominated in foreign currencies, which are translated at the period end exchange rates, are considered to approximate carrying value.

The fair values of certain financial assets carried at cost, including fair values of cash and due from banks are considered to approximate their respective carrying values due to their short-term nature and immateriality of losses on collectability. The fair value of investment securities has been estimated based on the market prices at the statement of financial position dates.

Trade receivables are disclosed at their amortized cost using the effective interest rate method and the carrying values of trade receivables along with the related allowances for collectability are estimated to be at their fair values.

The estimated fair value of receivables from finance sector operations represents the discounted amount of estimated future cash flows expected to be received, Expected cash flows are discounted at current market rates with similar currency and remaining maturity in order to determine their fair value.

Monetary liabilities

The fair value of bank borrowings and other monetary liabilities are considered to approximate their respective carrying values due to their short-term nature.

Long-term borrowings, which are principally at variable rates, and denominated in foreign currencies, are translated at the period-end exchange rates and accordingly, their fair values approximate their carrying values.

Trade payables are disclosed at their amortized cost using the effective interest rate method and accordingly their carrying amounts approximate their fair values.

The estimated fair value of demand deposits with no stated maturity classified under payables to finance sector operations, represents the amount repayable on demand. The fair value of overnight deposits is considered to approximate their carrying values. The estimated fair value of fixed-interest deposits is calculated based on discounted cash flows using market interest rates applied to similar loans and other debts. In case the maturities are short-term, the carried value is assumed to reflect the fair value.

NOTE 21 - FINANCIAL INSTRUMENTS

Fair Value of Financial Instruments

The fair values of financial assets and financial liabilities are determined as follows:

- First Level: The fair value of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices.
- Second Level: The fair value of other financial assets and financial liabilities are determined in accordance with generally accepted pricing models based on prices from observable current market transactions.
- Third Level: The fair value of the financial assets and financial liabilities is determined in accordance with the unobservable current market data.

The level classifications of financial assets and liabilities stated at their fair values are as follows:

		Fair value level as of reporting date		
Financial assets	**30 September 2026**	**Level 1 TRY**	**Level 2 TRY**	**Level 3 TRY**
